

Orl Tokata

FULL STACK DEVELOPER

CONTACT

orltokata@gmail.com

LANGUAGES

Khmer **Native**
English **Good**

TECHNICAL SKILLS

FRONT-END

Next.js Angular TypeScript
JavaScript jQuery HTML CSS
Bootstrap

BACK-END

Java Spring Boot JSP
REST API MyBatis JPA/Hibernate

DATABASE

PostgreSQL MySQL
Data Modeling

SECURITY

Spring Security JWT OAuth 2.0

ARCHITECTURE

MVC Pattern Design Patterns C#

METHODOLOGY

Agile / Scrum Git

WORK EXPERIENCE

Software Engineer II — Full Stack

Aug 2022 – Present

KOSIGN Cambodia Investment Co., Ltd

WABOOKS

WABOOKS TA

COMBill

- Developed and maintained **WABOOKS**, a financial accounting web application built with Java, JSP, and PostgreSQL, working within an **Agile / Scrum** team through planning, development, testing, and deployment cycles
- Built **WABOOKS TA** as a full-stack project using **Spring Boot** REST API and **Next.js** frontend, implementing **JWT-based authentication** via Spring Security for secure access control
- Built **COMBill** with **Spring Boot** and **Angular**, applying **MVC pattern** and design patterns to deliver a maintainable billing and financial processing system
- Implemented **OAuth 2.0** and **JWT** security flows to protect API endpoints and manage user authentication across services
- Designed and documented RESTful APIs, database schemas, and business logic for financial data processing, ensuring clear technical documentation for cross-team use
- Conducted system analysis to gather requirements, model data structures, and translate business needs into technical solutions
- Coordinated closely with front-end and back-end team members, building responsive UI components with TypeScript and AJAX for seamless financial module experiences

Java Spring Boot Next.js Angular PostgreSQL TypeScript
JWT OAuth 2.0 Spring Security REST API Agile/Scrum

EDUCATION

Bachelor of Information Technology

National Institute of Entrepreneurship and Innovation (NIEI)

2019 – 2023

Phnom Penh, Cambodia

Baccalaureate Degree

Teuk Laak High School

2018 – 2019

Phnom Penh, Cambodia

● **Software Development — Intensive Course**

Feb – Jul 2022

Korea Software HRD Center

Mon–Fri · 8 hrs/day · 816 hours total

JAVA

J2SE (OOP concepts), J2EE
(Servlet & MVC pattern)

WEB

HTML, CSS, JavaScript,
Bootstrap 4, MDBBootstrap,
FlexBox, jQuery, AJAX, JSON

SPRING

Spring Boot, MyBatis, JPA &
Hibernate, Spring RESTful,
Spring Security, Thymeleaf

DATABASE

PostgreSQL, SQL (Basic &
Advanced), Data Modeling

FINAL YEAR PROJECT

Restaurant Management System

C#

MySQL

Team Leader

Bachelor of Information Technology — Final Year Project · NIEI, 2023

- Led a team to design and develop a Restaurant Management System as the graduation project
- Conducted system analysis to define requirements; designed modules for order management, billing, and staff management using C# and MySQL
- Coordinated team members, assigned tasks, and ensured all milestones were achieved on schedule
- Successfully presented and defended the project before the evaluation committee
